Attack family, grouped
Which party is bounded
How tightly
Training data (24)
Model behaviour (56)
The model (6)
Record of training (13)
Several attacks (2)
No attack studied (99)
Attacker (86)
Learner (62)
Auditor (12)
Mechanism (7)
No party bounded (33)
Relative to honest work (11)
Exponent in own resource (27)
Algorithm class (24)
Polynomial time (31)
Quasi-polynomial time (4)
Under an assumption (8)
Numeric budget (46)
Measured only (14)
Unstated (35)
